The accompanying notes on pages 6 to 39 form an integral part of the consolidated and separate financial statements.

Dangote Sugar Refinery Plc

Consolidated and Separate Financial Statements for the Period Ended June 30, 2024

Notes to the Consolidated and Separate Financial Statements

1 General information

Dangote Sugar Refinery Plc (the Company) was incorporated as a Public Limited Liability company on 4 January 2005, commenced operation on 1 January 2006 and became quoted on the Nigerian Stock Exchange in March 2007. Its current shareholding is 68% by Dangote Industries Limited and 32% by the Nigerian public.

The ultimate controlling party is Greenview International Corporation, Cayman Island

The registered address of the Company is located at GDNL Administrative Building, Terminal E, Shed 20 NPA Apapa Wharf Complex, Apapa, Lagos

The consolidated financial statements of the Group for the Period ended 30 June comprise the Company and its subsidiaries - Taraba Sugar Company Limited, Adamawa Sugar Company Limited and Nasarawa Sugar Company Limited.

1.1 The principal activity

The principal activity of the Group is the refining of raw sugar into edible sugar and the selling of refined sugar. The Group's products are sold through distributors across the country.

Going Concern status

The Group has consistently been making profits. The Directors believe that there is no intention or threat from any party to curtail significantly its line of business in the foreseeable future. Thus, these financial statements are prepared on a going concern basis.

1.3 Operating environment

Emerging markets such as Nigeria are subject to different risks than more developed markets, including economic, political and social, and legal legislative risks. As has happened in the past, actual or perceived financial problems or an increase in the perceived risks associated with investing in emerging economies could adversely affect the investment climate in Nigeria and the country's economy in general. The global financial system continues to exhibit signs of deep stress and many economies around the world are experiencing lesser or no growth than in prior years. These conditions could slow or disrupt Nigeria's economy, adversely affecting the Group's access to capital and cost of capital for the Group and more generally, its business, result of operation, financial condition and prospects.

1.4 Financial period

These financial statements cover the financial period from 1 January 2024 to 30 June 2024 with comparatives for the year ended 31 December 2023 and period ended 30 June 2023.

2 Significant Accounting Policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Statement of compliance

These consolidated and separate financial statements have been prepared in accordance with International Financial Reporting standards (IFRS) as issued by the International Accounting Standards Board (IASB) and interpretations issued by the IFRS Interpretations Committee (IFRS IC) of IASB (together "IFRS") that are effective at 31 March 2022 and requirements of the Companies and Allied Matters Act of Nigeria and the Financial Reporting Council (FRC) Act 2011 of Nigeria.

Dangote Sugar Refinery Plc

Consolidated and Separate Financial Statements for the Period Ended June 30, 2024

Notes to the Consolidated and Separate Financial Statements

2.2 Basis of preparation

The consolidated and separate financial statements have been prepared on the historical cost basis except for biological assets which is measured at fair value less cost to sell. Historical cost is generally based on the fair value of the consideration given in exchange for assets. All amounts disclosed in the financial statements and notes have been rounded off to the nearest thousand Naira unless otherwise stated. The principal accounting policies are set out below:

2.3 Consolidation of subsidiaries

Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Company gains control until the date when the Company ceases to control the subsidiary. Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

When necessary adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation. The results of subsidiaries acquired or disposed of during the year are included in the Group statement of comprehensive income from the effective date of acquisition or up to the effective date of disposal as appropriate.

In the Company's separate financial statements, investments in subsidiaries are carried at cost less any impairment that has been recognised in profit or loss.

2.4 Revenue recognition

a) Accounting policy

Revenue is measured at the fair value of the consideration received or receivable for goods or services, in the ordinary course of the Group's activities and it is stated net of value added tax (VAT), rebates and returns. A valid contract is recognised as revenue after;

- The contract is approved by the parties.
- Rights and obligations are recognised.
- Collectability is probable.
- The contract has commercial substance.
- The payment terms and consideration are identifiable.

The probability that a customer would make payment is ascertained based on the evaluation done on the customer as stated in the credit management policy at the inception of the contract. The Group is the principal in all of its revenue arrangement since it is the primary obligor in all of the revenue arrangements, has inventory risk and determines the pricing for the goods and services.

Sale of goods

Revenue is recognised when the control of the goods and service are transferred to the customer. This occurs when the goods are delivered to the customer and customer's acceptance is received or when goods are picked up by the customers.

Revenue from sale of sugar and molasses is recognised based on the price specified in the contract, net of the estimated rebates and returns. Rebates are estimated at the inception of the contract except where the time lag between the recognition of revenue and granting rebates is within one month. Returns on goods are estimated at the inception of the contract except where the timing between when the revenue is recognised and when the returns occur is considered immaterial. In these instances, the returns are accounted for when they occur.

The delivery service provided by the Group is a sales fulfilment activity and the income earned is recognised at the point in time when the goods are delivered to the customer.

Delivery occurs when the goods have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and when the customer has accepted the products in accordance with the sales contract, or the acceptance provisions have lapsed, or the group has objective evidence that all criteria for acceptance have been satisfied.

Contract liability is recognised for consideration received for which the performance obligation has not been met.

Dangote Sugar Refinery Plc

Consolidated and Separate Financial Statements for the Period Ended June 30, 2024

Notes to the Consolidated and Separate Financial Statements

Revenue recognition (continued)

Disaggregation of revenue from contract with customers

The Group recognises revenue from the transfer of goods at a point in time in the following product lines. The Group derives revenue from the sale of sugar, molasses and freight services.

	Freight services	Sale of sugar	Sale of molasses	Total
	N'000	N'000	N'000	N'000
Revenue from contract with customers	267,819	292,797,753	2,558,868	295,624,440

2.5 Interest income Recognition

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of revenue can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset's to that asset's net carrying amount on initial recognition.

2.6 Pensions and Other post-employment benefits

The Group operates a defined contribution based retirement benefit scheme for its staff, in accordance with the amended Pension Reform Act of 2014 with employee contributing 8% and the employer contributing 10% each of the employee's relevant emoluments. Payments to defined contribution retirement benefit plans are recognised as an expense in statement of profit or loss when employees have rendered the service entitling them to the contributions.

2.7 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the statements of comprehensive income because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted.

Current income tax is the expected amount of income tax payable on the taxable profit for the year determined in accordance with the Companies Income Tax Act (CITA) using statutory tax rates of 30% at the reporting sheet date. Education tax is calculated at 2.5% of the assessable profits in accordance with the Tertiary Education Tax Act.

Dangote Sugar Refinery Plc

Consolidated and Separate Financial Statements for the Period Ended June 30, 2024

Notes to the Consolidated and Separate Financial Statements

2.7 Taxation (continued)

Current and deferred tax are recognised in profit and loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are recognised in other comprehensive income or directly in equity respectively. Where current tax and deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

Upon disposal of an associate that results in the Company losing significant influence over that associate, any retained investment is measured at fair value at that date and the fair value is regarded as its fair value on initial recognition as a financial asset in accordance with IAS 39. The difference between the previous carrying amount of the associate attributable to the retained interest and its fair value is included in the determination of the gain or loss on disposal of the associate. In addition, the Company account for all amounts previously recognised in other income in relation to that associate on the assets or liabilities. Therefore , if a gain or loss previously recognized in other comprehensive income by that associate would be reclassified to profit or loss on the disposal of the related assets and liabilities, the Company reclassifies the gain or loss from equity to profit or loss (as a reclassification adjustments) when it loses significant influence over the associate.

When the company transacts with its associate, profits and losses resulting from the transactions with the associate are recognized in the Company's financial statements only to the extent of interest in the associates that are not related to the Company.

An associate is an entity over which the Company has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control those policies.

Deferred tax

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net current and deferred tax are recognised in profit and loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are recognised in other comprehensive income or directly in equity respectively. Where current tax and deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

Dangote Sugar Refinery Plc

Consolidated and Separate Financial Statements for the Period Ended June 30, 2024

Notes to the Consolidated and Separate Financial Statements

2.8 Property, plant and equipment

i. Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses.

Cost includes expenditure that is directly attributable to the acquisition of the asset. Property, plant and equipment under construction are disclosed as capital work-in-progress. The cost of construction recognised includes the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use, the costs of dismantling and removing the items and restoring the site on which they are located, and borrowing costs on qualifying assets.

Purchased software that is integral to the functionality of the related equipment is capitalized as part of the equipment.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Gains and losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognized in the statement of comprehensive income.

ii. Subsequent costs

The cost of replacing a part of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The carrying amount of the replaced part is derecognized. The costs of the day-to-day servicing of property, plant and equipment are recognized in profit or loss as incurred.

Depreciation is calculated on the depreciable amount, which is the cost of an asset, or other amount substituted for cost, less its residual value.

Depreciation is recognized in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment which reflects the expected pattern of consumption of the future economic benefits embodied in the asset. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Company will obtain ownership by the end of the lease term in which case the assets are depreciated over the useful life.

The estimated useful lives for the current and comparative periods are as follows:

Item	Depreciation method	Average useful life
Buildings	Straight line	50 years
Plant and machinery	Straight line	15 -50 years
Furniture and fixtures	Straight line	5 years
Motor vehicles	Straight line	4 years
Tools and equipment	Straight line	4 years
Computer equipment	Straight line	3 years
Aircraft	Straight line	25 years
Bearer plants	Straight line	6 years

Land is not depreciated. Depreciation methods, useful lives and residual values are reviewed at each financial year end and adjusted if appropriate.

Capital work-in-progress is not depreciated. The attributable cost of each asset is transferred to the relevant asset category immediately the asset is available for use and depreciated accordingly.

Properties in the course of construction for production, supply or administrative purposes, or for purposes not yet determined, are carried at cost, less any recognised impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Company's accounting policy. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Dangote Sugar Refinery Plc

Consolidated and Separate Financial Statements for the Period Ended June 30, 2024

Notes to the Consolidated and Separate Financial Statements

2.8 Property, plant and equipment (continued)

Depreciation is recognised so as to write off the cost of assets (other than properties under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the term of the relevant lease.

2.9 Intangible assets

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each annual reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Derecognition of intangible assets

An intangible asset is derecognized on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognized.

Impairment of tangible and intangible assets

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any).

Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating-unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

2.10 Employee benefits

A liability is recognised when an employee has rendered services for benefits to be paid in the future, and an expense when the entity consumes the economic benefit arising from the service provided by the employee.

Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

Long-term employee benefits (Defined contribution plan)

Employees are members of defined contribution plans. Obligations for contributions to defined contribution pension plans are recognized as an employee benefit expense in profit or loss in the periods during which services are rendered by employees.

The group makes provision for retirement benefits in accordance with the Pension Reform Act 2014. The employees contribute 8% of their gross salary (basic, housing and transport) while the Group contributes 10% on behalf of the employees to the same plan.

Dangote Sugar Refinery Plc

Consolidated and Separate Financial Statements for the Period Ended June 30, 2024

Notes to the Consolidated and Separate Financial Statements

2.10 Employee benefits (continued)

Long-term employee benefits (Defined benefit plan)

For defined benefit plans, the Group's contributions were based on the recommendations of independent actuaries and the liability measured using the projected unit credit method, up to the date of cessation of the scheme on 30 September, 2013.

Under the plan, the employees were entitled to retirement benefits which vary according to length of service. Actuarial gains and losses were recognised in the income statement. These gains or losses were recognised over the expected average remaining working lives of the employees participating in the plans.

Past-service costs were recognised as an expense on a straight-line basis over the average period until the benefits became vested. If the benefits vested immediately following the introduction of, or changes to, a defined benefit plan, the past-service cost was recognised immediately.

2.11 Government grants

Government grants are recognised when there is reasonable assurance that:

- i) the group will comply with the conditions attaching to them; and
- ii) the grants will be received.

Government grants are recognised as income over the periods necessary to match them with the related costs that they are intended to compensate. Grants related to income are presented as a credit in the profit or loss (separately).

2.12 Leases

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether:

- the contract involves the use of an identified asset – this may be specified explicitly or implicitly. If the supplier has a substantive substitution right, then the asset is not identified;
- the Group has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- the Group has the right to direct the use of the asset. The Group has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used.

In rare cases where the decision about how and for what purpose the asset is used is predetermined, the Group has the right to direct the use of the asset if either:

- the Group has the right to operate the asset; or
- the Group designed the asset in a way that predetermines how and for what purpose it will be used.

The Group primarily leases land and building (used as office space, outlets, warehouse and residential use). The lease terms are typically for fixed periods ranging from 2 years to 25 years but may have extension options. On renewal of a lease, the terms may be renegotiated.

Contracts may contain both lease and non-lease components. The Group has elected to separate lease and non-lease components. The Group allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. Lease terms are negotiated on an individual basis and contain different terms and conditions, including extension and termination options. The lease agreements do not impose any covenants, however, leased assets may not be used as security for borrowing purposes.

Leases in which the Group is a lessee

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group. Each lease payment is allocated between the liability and finance cost. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

Leases in which the Group is a Lessor

(i) Operating lease

When assets are subject to an operating lease, the assets continue to be recognised as property and equipment based on the nature of the asset. Lease income is recognised on a straight line basis over the lease term.

Lease incentives are recognised as a reduction of rental income on a straight-line basis over the lease term.

(ii) Finance lease

When assets are held subject to a finance lease, the related asset is derecognised and the present value of the lease payments (discounted at the interest rate implicit in the lease) is recognised as a receivable. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income. Lease income is recognised over the term of the lease using the net investment method (before tax), which reflects a constant periodic rate of return.

Dangote Sugar Refinery Plc

Consolidated and Separate Financial Statements for the Period Ended June 30, 2024

Notes to the Consolidated and Separate Financial Statements

2.13 Inventories

Inventories are stated at the lower of cost and net realisable value. Cost of raw materials, packaging materials, engineering spares and consumable stock is determined on a weighted average basis. Cost of finished goods is determined on the basis of standard costs adjusted for variances. Standard costs are periodically reviewed to approximate actual costs.

Goods in transit are valued at the invoice price. Cost of inventory includes purchase cost, conversion cost (materials, labour and overhead) and other costs incurred to bring inventory to its present location and condition. Finished goods, which include direct labour and factory overheads, are valued at standard cost adjusted at year-end on an actual cost basis.

Costs, including an appropriate portion of fixed and variable overhead expenses, are assigned to inventories by the method most appropriate to the particular class of inventory, with the majority being valued on an average cost basis. Net realizable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

2.14 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation (when the time value of money is material).

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

2.15 Financial instruments

a) *Financial instruments accounting policy*

IFRS 9 replaces the provisions of IAS 39 that relate to the recognition, classification and measurement of financial assets and financial liabilities; derecognition of financial instruments; impairment of financial assets and hedge accounting. IFRS 9 also significantly amends other standards dealing with financial instruments such as IFRS 7 Financial Instruments disclosures.

i) **Classification and measurement**

Financial assets

It is the Company's policy to initially recognise financial assets at fair value plus transaction costs, except in the case of financial assets recorded at fair value through profit or loss which are expensed in profit or loss.

Classification and subsequent measurement is dependent on the Company's business model for managing the asset and the cashflow characteristics of the asset. On this basis, the Company may classify its financial instruments at amortised cost, fair value through profit or loss and at fair value through other comprehensive income.

The business models applied to assess the classification of the financial assets held by the company are;

- Hold to collect: Financial assets in this category are held by the Company solely to collect contractual cash flows and these cash flows represents solely payments of principal and interest. Assets held under this business model are measured at amortised cost
- Fair value through other comprehensive income: Financial assets in this category are held to collect contractual cash flows and sell where there are advantageous opportunities. The cash flows represents solely payment of principal and interest. These financial assets are measured at fair value through other comprehensive income.
- Fair value through profit or loss: This category is the residual category for financial assets that do not meet the criteria described above. Financial assets in this category are managed in order to realise the asset's fair value.

The financial assets of Dangote Sugar are held to collect contractual cashflows that are solely payments of principal (for non-interest bearing financial assets) or solely payments of principal and interest ((for interest bearing financial assets)

Dangote Sugar Refinery Plc

Consolidated and Separate Financial Statements for the Period Ended June 30, 2024

Notes to the Consolidated and Separate Financial Statements

2.15 Financial instruments (continued)

The Company's financial assets include trade and other receivables, cash and cash equivalents. They are included in current assets, except for maturities greater than 12 months after the reporting date. Interest income from these assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in finance income/cost.

Financial liabilities

Financial liabilities of the Company are classified and measured at fair value on initial recognition and subsequently at amortised cost net of directly attributable transaction costs. The Company's financial liabilities include trade and other payables and interest bearing loans and borrowings.

Impairment of financial assets

Recognition of impairment provisions under IFRS 9 is based on the expected credit loss (ECL) model. The ECL model is applicable to financial assets measured at amortised cost or at fair value through other comprehensive income (FVOCI). The measurement of ECL reflects an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes, time value of money and reasonable and supportable information that is available without undue cost or effort at the reporting date, about past events, current conditions and forecasts of future economic conditions.

The simplified approach is applied for trade receivables while the general approach is applied to staff loans, amounts due from related parties that are not trade related, balances with banks.

The simplified approach requires lifetime expected credit losses to be recognised on initial recognition of the receivables. This involves determining the expected loss rates using a provision matrix that is based on the Company's historical default rates observed over the expected life of the receivable and adjusted for forward-looking estimates. This is then applied to the gross carrying amount of the receivable to arrive at the loss allowance for the period.

The three-stage approach assesses impairment based on changes in credit risk since initial recognition using the past due criterion and other qualitative indicators such as increase in political concerns or other macroeconomic factors and the risk of legal action, sanction or other regulatory penalties that may impair future financial performance. Financial assets classified as stage 1 have their ECL measured as a proportion of their lifetime ECL that results from possible default events that can occur within one year, while assets in stage 2 or 3 have their ECL measured on a lifetime basis.

Under the three-stage approach, the ECL is determined by projecting the probability of default (PD), loss given default (LGD) and exposure at default (EAD) for each ageing bucket and for each individual exposure. The PD is based on default rates determined by external rating agencies for the counterparties. The LGD is determined based on management's estimate of expected cash recoveries after considering the historical pattern of the receivable, and assessing the portion of the outstanding receivable that is deemed to be irrecoverable at the reporting period. The EAD is the total amount outstanding at the reporting period. These three components are multiplied together and adjusted for forward looking information, such as the gross domestic product (GDP) in Nigeria, inflation and exchange rate, to arrive at an ECL which is then discounted back to the reporting date and summed. The discount rate used in the ECL calculation is the original effective interest rate or an approximation thereof.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the related financial assets and the amount of the loss is recognised in profit or loss.

Significant increase in credit risk and default definition

The Company assesses the credit risk of its financial assets based on the information obtained during periodic review of publicly available information, industry trends and payment records. Based on the analysis of the information provided, the Company identifies the assets that require close monitoring.

Furthermore, financial assets that have been identified to be more than 30 days past due on contractual payments are assessed to have experienced significant increase in credit risk. These assets are grouped as part of Stage 2 financial assets where the three-stage approach is applied.

In line with the Company's credit risk management practices, a financial asset is defined to be in default when contractual payments have not been received at least 90 days after the contractual payment period. Subsequent to default, the Company carries out active recovery strategies to recover all outstanding payments due on receivables. Where the Company determines that there are no realistic prospects of recovery, the financial asset and any related loss allowance is written off either partially or in full.

Dangote Sugar Refinery Plc

Consolidated and Separate Financial Statements for the Period Ended June 30, 2024

Notes to the Consolidated and Separate Financial Statements

2.15 Financial instruments (continued)

Derecognition

Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or when it transfers the financial asset and the transfer qualifies for derecognition. Gains or losses on derecognition of financial assets are recognised in profit or loss.

Financial liabilities

The Company derecognises a financial liability when it is extinguished i.e. when the obligation specified in the contract is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised immediately in the statement of profit or loss.

Offsetting of financial assets and financial liabilities

Financial assets and liabilities are offset and the net amount is reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts, and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

The legally enforceable right is not contingent on future events and is enforceable in the normal course of business, and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

2.16 Earnings per share

The Group presents basic and diluted earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Group by the weighted average number of ordinary shares outstanding during the period, adjusted for own shares held, if any. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding, adjusted for the effects of all dilutive potential ordinary shares.

2.17 Functional and presentation currency

Items included in the consolidated and separate financial statements of each of the Group entities are measured using the currency of the primary economic environment in which the entity operates (the functional currency).

The consolidated and separate financial statements are presented in Naira which is the Company's functional and presentation currency.

Foreign currency transactions and translation

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the statement of profit or loss and other comprehensive income.

Non-monetary assets and liabilities in a foreign currency that are measured in terms of historical cost are translated using the exchange rate at the transaction date and are not restated.

Non-monetary assets and liabilities denominated in foreign currencies that are stated at fair value are translated to the functional currency at foreign exchange rates prevailing at the dates the fair value was determined and are not restated.

2.18 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction, or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

Dangote Sugar Refinery Plc

Consolidated and Separate Financial Statements for the Period Ended June 30, 2024

Notes to the Consolidated and Separate Financial Statements

2.19 Segment information

An operating segment is a component of an entity:

- that engages in business activities from which it may earn revenue and incur expenses (including revenues and expenses relating to transactions with other components of the same entity);
- where operating results are regularly reviewed by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance;
- for which discrete information is available. Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker who is responsible for allocating resources and assessing performance of the operating segments has been identified as the Managing Director of Dangote Sugar Refinery Plc

2.20 Biological assets

A biological asset is defined as a living animal or plant while biological transformation comprises the processes of growth, degeneration, production and procreation that cause qualitative or quantitative changes in biological asset.

Recognition of assets

The Group recognises biological assets or agricultural produce when, and only when, all of the following conditions are met:

- the Group controls the asset as a result of past events;
- it is probable that future economic benefits associated with the asset will flow to the Group; and
- the fair value or cost of the asset can be measured reliably.

Biological asset consists of growing cane which are yet to be harvested as at year end, and these are measured at fair value less cost to sell.

The basis of fair value determination of growing canes have been included in Note 17.

2.21 Business combination under common control

Business combinations under common control occur when combining entities/businesses are ultimately controlled by the same party(ies) both before and after the business combination, and that control is not transitory.

The Group applies the "predecessor method" of accounting for business combinations under common control because such transactions are outside the scope of the reporting standard on Business Combinations (IFRS 3). The assets and the liabilities of the acquiree are recorded at the predecessor carrying values from the financial statements of the highest entity that has common control for which financial statements are prepared. Therefore, no goodwill is recorded in the consolidated financial statements of the acquirer.

Any difference arising between the acquirer's cost of investment and the acquiree's net assets is recorded directly in equity. Any non-controlling interest is measured as a proportionate share of the book values of the related assets and liabilities. Comparative amounts are not restated but the transaction is accounted for prospectively, i.e., from the effective date of the transaction (transfer of control). Any expenses incurred as a result of the combination are written off immediately in the statement of profit or loss and other comprehensive income.

3 Critical judgements and sources of estimation uncertainty

The following are the critical judgements, apart from those involving estimations, that the directors have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in the consolidated financial statements.

The key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

Dangote Sugar Refinery Plc

Consolidated and Separate Financial Statements for the Period Ended June 30, 2024

Notes to the Consolidated and Separate Financial Statements

i) Impairment of financial assets

The loss allowances for financial assets are based on assumptions about risk of default, expected loss rates and maximum contractual period. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Details of the key assumptions and inputs used are disclosed in note 32.

Sensitivity of estimates used in IFRS 9 ECL

Estimation uncertainty in measuring impairment loss

In establishing sensitivity to ECL estimates for trade receivables and related parties receivables, two variables (GDP growth rate and Inflation rate) were considered. The Company's receivables portfolio reflects greater responsiveness to both variables considered.

ii) Fair values of biological assets

The directors have developed a model using the multi-period excess earnings method (MPEEM) under the income approach for the valuation of sugar cane. In order to generate a stream of cash flows to be used in this model, the directors calculate tonnage using information on hectares of farmland planted, the age of growing cane per hectare and the yield rate per hectare.

The cane price is then applied on the tonnage and discounted to arrive at the fair value of the sugar cane. The cane price is based on the industry out-grower price.

The directors exercise significant judgement in determining the yield rate per hectare, the discount rate, cost of sales, selling and distribution expenses, administrative expenses and contributory assets charges.

4 New Standards and Interpretations

i) Standards and interpretations effective and adopted in the current year

There are no new standards applicable to annual reporting period commencing 1 January 2024 which are expected to have a material impact on the group:

ii) New standards and interpretations not yet adopted

Certain new accounting standards and interpretations have been published that are not mandatory for 31 December 2022 reporting periods and have not been early adopted by the group. These standards are not expected to have a material impact on the entity in the current or future reporting periods and on foreseeable future transactions.

Dangote Sugar Refinery Plc

Consolidated and Separate Financial Statements for the Period Ended June 30, 2024

Notes to the Consolidated and Separate Financial Statements

6.1 Segment information (Continued)

6.2 Segment assets and liabilities

The amount provided to the chief operating decision maker with respect to total assets are measured in a manner consistent with that of the financial statements. These assets are allocated based on the operations of the of the segment and the physical location of the asset.

Investments in shares held by the Group and deferred tax assets are not considered to be segment assets and are not allocated to segments.

Capital expenditure reflects additions to non-current assets, other than financial instruments, deferred tax assets, post employment benefit assets and rights arising under insurance contracts.

The amounts provided to the chief operating decision maker with respect to the total liabilities are measured in a manner consistent with that of the financial statements. These liabilities are allocated based on the operations of the segment.

The Group's interest-bearing liabilities are not considered to be segment liabilities but rather are managed by the Group's treasury function.

The table below provides information on the segment assets and liabilities as well as a reconciliation to total assets and liabilities as per the balance as at 30 June 2023;

Included in the Lagos segment is asset held for sale of N868.6 million (2023: N868.6 million).

Information about major customers

The company has one Customer(NBC) whose Sales make up 37.3% of total revenue. The revenue from the customer within the second Quarter 2024 is 62.7 billion and the revenue from the Customer is included in Lagos Region.

Dangote Sugar Refinery Plc

Consolidated and Separate Financial Statements for the Period Ended June 30, 2024

Notes to the Consolidated and Separate Financial Statements

6 Segment information (Continued)

Distributors

The Group sells unfortified sugar mainly to pharmaceutical, food and beverage manufacturers, while Vitamin A-fortified sugar is sold to distributors who sell to small wholesalers, confectioners and other smaller value-adding enterprises who provide the distribution network to the Nigerian retail market. The Group sells a small amount of sugar directly to retail customers. Retail packaging comes in various sizes of 250g, 500g, and 1kg under the brand name "Dangote Sugar". Sales to distributors account for 65% of the Group's revenue.

The Group provides a delivery service to customers by transporting refined sugar to other destinations. Freight income represents revenue earned in this respect during the period. The associated cost of providing this service is included in Cost of sales.

13 Deferred tax balances

Deferred income taxes are calculated on all temporary differences under the liability method using an effective tax rate of 30% (2022: 30%). The deferred tax assets and the deferred tax liability relate to income tax in the same jurisdiction and the law allows net settlement.

Deferred tax assets are recognised only to the extent that is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax assets /(liabilities)

Deferred tax liabilities are attributable to the following:

Property plant and equipment @ 30%	(13,667,444)	(13,667,444)	2,658,340	(13,667,444)	(13,667,444)	2,658,340

Description of biological assets and activities

Biological assets comprise of growing cane. The growing cane represents biological assets which are expected to be harvested as agricultural produce, intended for production of sugar. The biological assets have been measured at fair value less cost to sell. As at 30 Jun, 2024, the group has a total of 8,612 hectares of growing canes.

Basis for measurement of fair value

The Group adopted the multi-period excess earnings method (MPEEM) under the income approach to estimating the fair value of the Biological Assets. The MPEEM estimates the fair value of an asset based on the cash flows attributable to the asset after deducting the cash flows attributable to other assets (contributory assets). This approach is commonly used for sugarcane considering that land, plant and machinery and the bearer plant are accounted as PPE in line with IAS 16 and considered as contributory assets for the purpose of MPEEM valuation.

The fair value of biological assets are determined based on unobservable inputs, using the best information available in the circumstances and therefore falls within the level 3 fair value category. Growing cane were valued using the income approach.

Key assumptions and inputs	30/6/2024	31/12/2023	30/6/2023	30/6/2024	31/12/2023	30/6/2023
Industry out-grower price. (N per ton)	44,041	34,899	21,713	44,041	17,874	21,713
Average yield per hectare (tonnes)	82.62	83.44	82.74	82.62	81.90	82.74
Discount rate (%)	14.99%	15.01%	14.29%	14.99%	15.46%	14.29%

Changes in fair value of the biological asset are recognised in the statement of profit and loss.

Financial risk management strategies for biological assets

The group is exposed to risks arising from environmental and climatic changes, commodity prices and financing risks. The group has strong environmental policies

Consolidated and Separate Financial Statements for the Period Ended June 30, 2024

Notes to the Consolidated and Separate Financial Statements

	GROUP 30/6/2024 N'000	GROUP 31/12/2023 N'000	GROUP 30/6/2023 N'000	COMPANY 30/6/2024 N'000	COMPANY 31/12/2023 N'000	COMPANY 30/6/2023 N'000
19 Asset held for sale	868,642	868,642	868,642	868,642	868,642	868,642

The asset is a large expanse of land at Plot 23 Division 9, W110 Road, Kolai'a Local Government, Tipaza Province, Algeria. It is currently covered with light green vegetations, with delineating boundaries/paths partly marked with wire-mesh fitted to steel poles. The immediate neighbourhood features both industrial and agricultural uses and notable landmarks in the vicinity of the property include SPA Société Des Tabacs Algero-Emirate (STAEM) and Zone Industrielle Mazafran. Based on land survey plan, the site extends to c.6 Hectares 22 Yards 29 Centiyard.

The Management of DSR assess that the land's value has not been impaired or diminished since the last valuation carried out on 19th August 2021 by international Land Economists, KNIGHT FRANK LLP, as the opportunities presented in the valuation remain valid. The threat of Corona virus and political stability of the country, Algeria, where the land is located has also improved since the valuation. The DSR Management therefore assess the fair value of the land remains the same as the value presented in the valuation report by KNIGHT FRANK LLP.

20 Investment in subsidiaries

Other financial asset is in respect of the deposit for open Letters of Credit with the banks.

Trade receivables disclosed above include amounts (see note 32 for aged analysis) that are past due more than 30 days as at the reporting date for which the company has not recognised an allowance for doubtful debts because there has not been a significant change in credit quality and the amounts are still considered recoverable.

23.1 Negotiable duty credit certificate

The Company has received certificates for N707 million termed as Negotiable Duty Credit Certificate (NDCC). However, N83.5 Million matured during the year 2022 which reduced the balance to N623.6 Million. The NDCC is an instrument of the government for settling of the EEG receivables. The NDCC is used for the payment of Import and Excise duties in lieu of cash. The recently issued Government promissory notes that relates to the last tranches of export carried out by the company are being converted to cash based on the maturity dates indicated on the instruments. However, the old NDCC which ought to be utilized for payment of import and exercise duty in lieu of cash is yet to be enjoyed just like other players within the industry

23.2 Allowance for impairment of financial assets

Company and Group	Other Receivables		Trade		Related party		Staff loans	Total

In 2016, the Group received a 10-year loan of N2 Billion from Zenith Bank Plc, with two years moratorium on principal, at an interest of 9% per annum payable quarterly. It is secured on fixed and floating assets of Savannah Sugar Limited.

29 Employee benefits

Defined benefit plan

The Group operated a defined benefit plan for all qualifying employees up till 30 September 2013. Under the plan, the employees were entitled to retirement benefits which vary according to length of service. At the date of discontinuation, qualified staff as at this date are to be paid their retirement benefit at the point of exit hence the recognition as a current liability as it is payable on demand. The amounts stated in the financial statement as at 2013 are based on actuarial valuation carried out in 2013. For the purpose of comparison the present value of the defined benefit obligation, and the related current service cost and past service cost stated in the books up till 30 September 2013 was measured using the Project Unit Credit Method.

The most recent Actuarial Valuation was carried out in 2013 using the staff payroll of 30 September 2013.

Defined contribution plan

The Group operates a defined contribution retirement benefit plan for all qualifying employees. The assets of the plans are held separately from those of the Group in funds under the control of trustees.

The employees contribute 8% of their gross salary (basic, housing and transport) while the Group contributes 10% on behalf of the employees to the same plan.

Rental income on operating lease (Note 11)	48,810	188,064	50,270	48,810	188,064	50,270

32 Risk management

Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholder and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

The capital structure of the Group is made up of equity comprising issued capital, share premium and retained earnings. The Group is not subject to any externally imposed capital requirements.

The Group's risk management committee reviews the capital structure of the Group on an annual basis. As part of this review, the committee considers the cost of capital and the risks associated with each class of capital. The Group is not geared as at 30 June 2024 (see below).

Consistent with others in the industry, the Group monitors capital on the basis of the gearing ratio.

This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the statement of financial position as at 30 June 2024) less cash and cash equivalents. Total capital is calculated as 'equity' as shown as at 30 June 2024 plus net debt.

The gearing ratio at 2024 and 2023 respectively were as follows:

	GROUP 30/6/2024 N'000	GROUP 31/12/2023 N'000	GROUP 30/6/2023 N'000	COMPANY 30/6/2024 N'000	COMPANY 31/12/2023 N'000	COMPANY 30/6/2023 N'000
Total borrowings						
Borrowings (Note 28)	394,318	531,563	717,508	394,318	531,563	657,781
Less: Cash and cash equivalent (Note 24)	183,129,283	204,762,703	157,856,886	182,958,676	204,677,479	157,579,408
Net Cash	182,734,965	204,231,140	157,139,378	182,564,358	204,145,916	156,921,627
Total Equity	(64,762,254)	79,245,785	125,013,681	(61,439,724)	81,809,908	126,712,512
Gearing ratio	-1%	1%	1%	-1%	1%	1%

Financial risk management

The Group's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance. The Group uses derivative financial instruments to hedge certain risk exposures.

Risk management is carried out by a central treasury department (Group treasury) under policies approved by the board. Group treasury identifies, evaluates and hedges financial risks in close co-operation with the Group's operating units. The board provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

Liquidity risk management

The Company monitors its risk to a shortage of funds by maintaining a balance between continuity of funding and by continuously monitoring forecast and actual cash flows and by matching the maturity profiles of financial assets and liabilities. To manage liquidity risk, our allocation of Letters of Credit on raw sugar and spares/chemicals are spread over dedicated banks. Therefore, the establishment of these Letters of Credit which are commitments by the banks provide security to our funds placed on deposit accounts. In other words our funds placed are substantially tied to our obligations on raw sugar and spares.

Financial liabilities that can be repaid at any time have been assigned to the earliest possible time period. It is not expected that the cash flows included in the maturity analysis could occur significantly earlier, or at significantly different amounts.

Credit risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss.

The Group is exposed to credit risk from its investing activities (primarily for trade receivables) and from its financing activities, including deposits with banks and other financial institutions. The Group has a credit management committee that is responsible for carrying out preliminary credit checks, review and approval of bank guarantees to credit customers. A credit controller also monitors trade receivable balances and resolves credit related matters.

Before accepting any new customer to buy on credit, the customer must have purchased goods on cash basis for a minimum period of six months in order to test the financial capability of the customer. Based on good credit rating by the credit committee of the Company, the customer may be allowed to migrate to credit purchases after the presentation of an acceptable bank guarantee which must be valid for one year.

Concentration of risk

The company supply Sugar on Cash & Credit basis. Customers pay before Supply is made and Trade Receivables of Q2 is sales of Sugar on credit to our Customers #9,653,407,145.65

Notes to the Consolidated and Separate Financial Statements

32 Risk management (continued)

Deposits with banks and other financial institutions

Credit risk from balances with banks and financial institutions is managed by the Group's treasury department in accordance with its corporate treasury policy that spells out counterparty limits, lists of financial institutions that the Group deals with and the maximum tenure of fixed term funds. Surplus funds are spread amongst these institutions and funds must be within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by the Corporate Treasurer periodically and may be updated throughout the year. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through the potential counterparty's failure.

Maximum exposure to credit risks

The carrying value of the Group's financial assets represents its maximum exposure to credit risk. The maximum exposure to credit risk at the reporting date was:

Financial instrument	GROUP	GROUP	GROUP	COMPANY	COMPANY	COMPANY
	30/6/2024	31/12/2023	30/6/2023	30/6/2024	31/12/2023	30/6/2023

Excluded from the other receivables balance shown above are the VAT, advance to vendors, Withholding tax receivable and NDCC receivables, these are not financial instruments.

Interest rate risk management

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group is exposed to fluctuations in interest rates on its borrowings. The Group pays fixed/floating rate interest on its borrowings. The company actively monitors interest rate exposures on its investment portfolio and borrowings so as to minimise the effect of interest rate fluctuations on the income statement. The risk on borrowings is managed by the company by maintaining an appropriate mix between fixed and floating rate borrowings. All loans, cash and cash equivalent are fixed interest based and therefore the company does not have any exposure to the risk of changes in market rates.
